Step 1: Carefully remove tile and set aside until Step 5. Lay tile flat--do not stand tile on edge. Remove all protective materials and set parts on a flat, non-abrasive surface. Identify parts packed in the carton against the parts list.

Step 2: Place the table rim upside down on a flat, non-abrasive surface. Attach a table leg to the table rim by using the 1/4 x 20mm bolt and washer as shown in **Figure 1**. Guide the bolt through the hole in the table leg into the pre-drilled hole in the table rim. **Hand tighten only 2-3 turns.** Repeat for the other three legs.

Step 3: Attach a leg to the leg connector bracket by using the bolts and washers as shown in **Figure 2**. Guide the bolts through the holes in the leg connector bracket, into the pre-drilled hole in the leg. **Hand tighten only 2-3 turns.** Repeat for the other three legs.

Step 4: After making any necessary adjustments to the alignment of the table base and table rim, use the hex bolt driver to tighten all bolts. **Note:** each bolt must be tightened a few revolutions at a time. In order to apply equal pressure to all bolt joints, we recommend working in a cross corner (X fashion). Repeat until all bolts are tight. **Do not over tighten.** Over tightening may strip bolts. Cover all bolts with covers.

Step 5: With the help of another person, turn the table in the upright position. Note the clear bumpers spaced evenly throughout the inside of the rim. Carefully place tile inside the rim, resting on the clear bumpers. Your table is now ready for use.

IMPORTANT NOTE: Damage to welds or frames resulting from over tightened bolts or improper assembly is not covered under our warranty. Please read all instructions carefully before assembly. If you have any questions regarding your assembly, call our Customer Service Center at 1-888-707-1880.

CARE AND MAINTENANCE

FRAMES

Cleaning - Use mild soap and warm water. Do not use abrasive materials, cleansers or bleach products. Rinse with clean water and dry thoroughly.

Maintenance - Periodically clean and dry thoroughly. Be sure to drain any water accumulated inside the frames. To thoroughly drain frames, remove foot caps and tilt the frames, if necessary, to remove all water. This is critical. Water allowed to accumulate inside the frames and then exposed to sub-freezing temperatures can cause damage to the frame tubing. Such damage is not covered under warranty. Always clean, drain and dry thoroughly before storing for the winter. For best results, always store or cover your furniture when not in use. We recommend commercially available outdoor furniture covers. Any small nicks or scratches can be covered with a light application of touch-up paint.

** When cleaning or moving large or heavy items, always have two people work together. Never drag furniture.

CERAMIC TILE

Use clean water and mild detergent or commercially available ceramic tile cleaners as necessary. Do not use abrasive materials or cleansers as they may scratch the surface of the tiles. Dry with a soft cloth. Do not use commercially available ceramic tile cleaners on table frame.

SPECIAL WARNINGS!!!

PLEASE TAKE PRECAUTION AND DO NOT ALLOW ANYONE TO CLIMB, STAND, CRAWL OR WALK ON TOP OF THE TABLE.

UMBRELLA USAGE WARNING!

If you will be using an umbrella with your table, make sure the plastic umbrella ring is inserted into the hole in the center of the table. Place the umbrella through the opening and into an umbrella stand made of cast iron, wrought iron, steel plate or blow molded plastic filled with 20-50 lbs or 9-22 kgs of sand or water. If your table is 72" or 182 cm or larger, we recommend a weight of at least 50 lbs or 22 kgs or more. NEVER USE AN UMBRELLA WITH A TABLE WITHOUT USING AN UMBRELLA BASE OR RING AS DESCRIBED ABOVE. ALWAYS REMOVE YOUR UMBRELLA FROM THE TABLE WHEN NOT IN USE. NEVER USE AN UMBRELLA DURING STORMS OR WINDY CONDITIONS.

Furniture covers are a great way to protect your set from harsh elements of weather and UV light. However, it is important to ensure furniture and covers are free of moisture and debris before covering. It is also necessary to promptly uncover furniture after rain and during periods of high humidity to prevent moisture build up. Failure to do so can lead to permanent surface and finish damage.
